

# Express your Interest in Calls

- If you are a member of INNODARE Platform Enter to «R&D Funding and Project Consortium Building» through [Consultancy Menu](#)
- Otherwise become a [member](#)
- Enter the call you are interested in and your details as indicated on the page
- If you are selected as a member of the consortium you will be informed by e-mail with details

Please indicate the calls you are interested in and the partner requirements you are looking for, below;

The call identifier or the project subject you are interested in

Your Comments

Indicate the main scope you can contribute.

Your Comments

Are you looking for a coordinator?

Your Comments

Can you coordinate the project?

Your Comments

# Enter Your Contribution for the Call Sections

- If you have been selected as a consortium member go to the «Project Development Area» under [Insight Menu](#)
- Select the project for which you are a consortium member

## Project Development Area

**This area is confidential to consortium members of each project.**

The project development area of the INNODARE Platform provides an efficient and agile methodology to prepare the projects as a consortium. You do not have to get lost among hundreds of emails. Your comments and contributions can be input through the "Project Development Area" and your project document will be prepared in parallel through the editors of your consortium. You will end up with sound proposals in a shorter time, reducing the waste time considerably.

HORIZON-CL5-2023-D6-01-01: User-centric development of Autonomous Vehicles to optimise

# Enter Your Contribution for the Call Sections

- On this page, you will see all the requirements of the call
- You can select the section you want to give your input
- You can write your comments and add pictures

This topic implements the co-programmed European Partnership on 'Connected, Cooperative and Automated Mobility' (CCAM). As such, projects resulting from this topic will be expected to report on results to the European Partnership 'Connected, Cooperative and Automated Mobility' (CCAM) in support of the monitoring of its KPIs.

# Collection and Organization of Inputs

- The collection of the inputs will be carried out by the editors assigned by the coordinator. Some of the consortium members and the coordinator of the project will be editors.
- The editors will have the right to change and update the related call document
- Other participants can read and leave comments

# Advantages of the System

- No possibility of losing comments through e-mails
- An exact list of the partners with contributions and dates
- Section-wise list of comments for ease of proposal drafting
- Easy editing by authorized consortium members, no confusion
- Confidentiality
- Faster and more efficient proposal development
